Notes: Data exclude emissions from cement production and gas flaring. Data for Russia is only available from after the break-up of the Soviet Union.

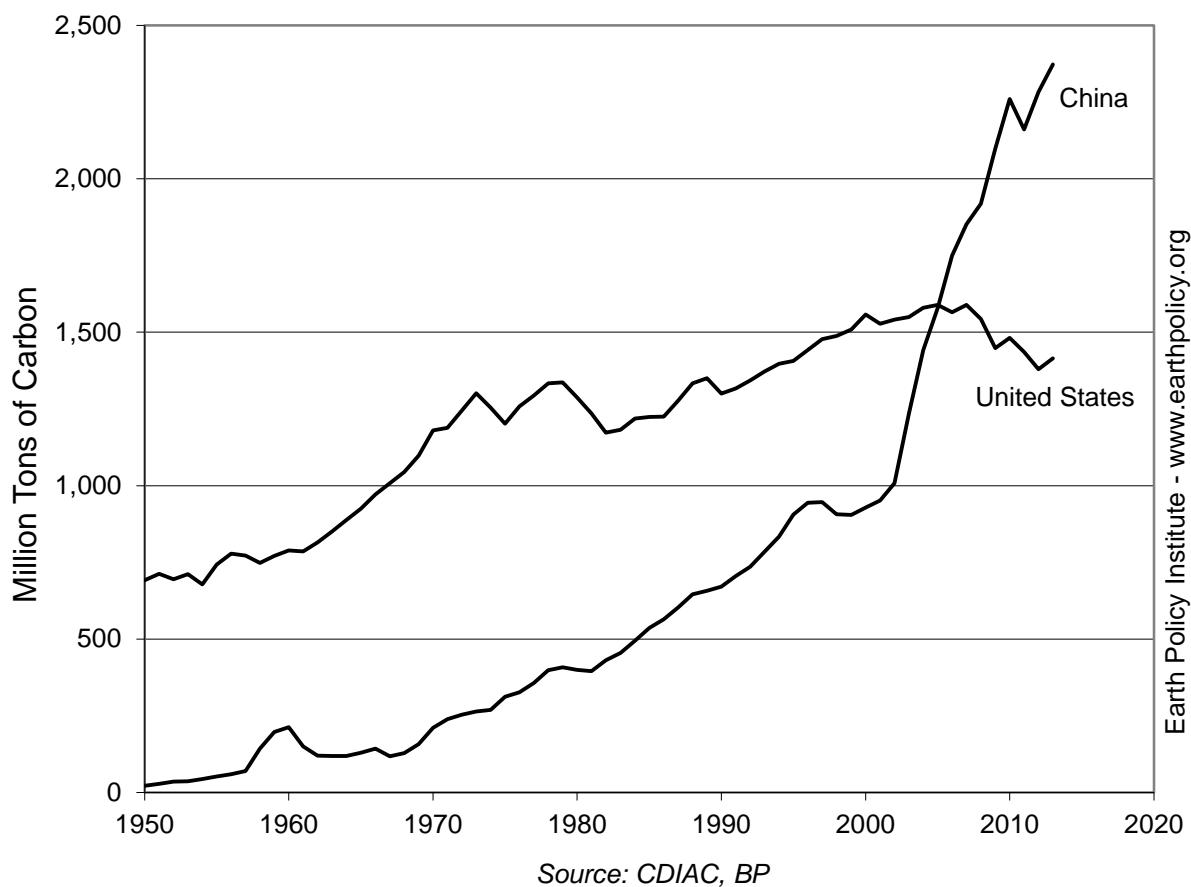

Emissions figures are in million tons of carbon. For tons of CO₂, multiply by 44/12.

Notes: List only includes countries that emitted 10 million tons of carbon or more in latest year. Emissions figures are in million tons of carbon; for tons of CO₂, multiply by 44/12.

* indicates 2013 data unavailable; most recent year (2010) was used instead. † indicates that change over the 3-year period 2007 to 2010 was used because of data availability. Boldface indicates country's emissions grew over latest 5-year period.
